Specification

General purpose solid culture medium according to ISO 21528 & 6579 standards.

Formula * in g/L

Peptone..... 5.00
Meat extract..... 3.00
Sodium chloride..... 5.00
Agar..... 15.00

Final pH 7.0 ±0,2 at 25 °C

* Adjusted and /or supplemented as required to meet performance criteria

Directions

Suspend 28 g of powder in 1 L of distilled water and bring to the boil. Dispense into suitable containers and sterilize in the autoclave at 121°C for 15 minutes.

Description

By the addition of sodium chloride the present formulation is a modification of the classical formulation of APHA and other ISO standards. The inclusion of sodium chloride gives an osmotic pressure more appropriate for bacterial growth.
